

TABLE OF CONTENTS

History: 113, 305.	Functional equations and operational calculus: 132, 310.
Foundations: 65, 209, 337.	Functional analysis, ergodic theory: 102, 220, 313.
Algebra: 115, 241, 340.	Calculus of variations: 59, 225.
Equations, polynomials: 116, 241, 341.	Theory of probability: 106, 227.
Linear algebra: 118, 243.	Theoretical statistics: 108, 231.
Abstract algebra: 120, 244, 342.	Applications of the theory of probability: 237.
Number theory: 33, 145, 247, 346.	Topology: 67, 177, 319.
Theory of groups: 1, 124, 210, 307.	Geometry: 8, 135, 151, 258, 294.
Analysis: 43, 75, 128, 180, 218, 254, 273, 310, 351.	Convexities, extremal problems: 11, 260.
Calculus: 77, 254.	Algebraic geometry: 13, 136.
Special problems (inequalities, convex functions, etc.): 75, 218, 351.	Differential geometry: 15, 154, 297.
Theory of sets, theory of functions of real variables: 128, 255, 352.	Numerical and graphical methods: 61, 238, 366.
Theory of functions of complex variables: 78, 180, 273, 355.	Mechanics: 23, 167, 205, 263, 326.
Theory of series: 88, 277.	Dynamics, celestial mechanics: 23, 205, 263, 326.
Fourier series and integrals, theory of approximation: 92, 189, 279, 360.	Relativity: 25, 207, 264.
Special functions: 43, 284.	Hydrodynamics, aerodynamics, acoustics: 25, 168, 265, 327.
Differential equations: 47, 197, 287, 363.	Theory of elasticity: 29, 172, 269, 332.
Integral equations: 99, 311.	Mathematical physics: 138, 333.
	Author index: 369.
	Subject index: 403.
	Errata: 419.
